Getting Started

Requirements

In order to run HealthNet on your computer, you will need the following:

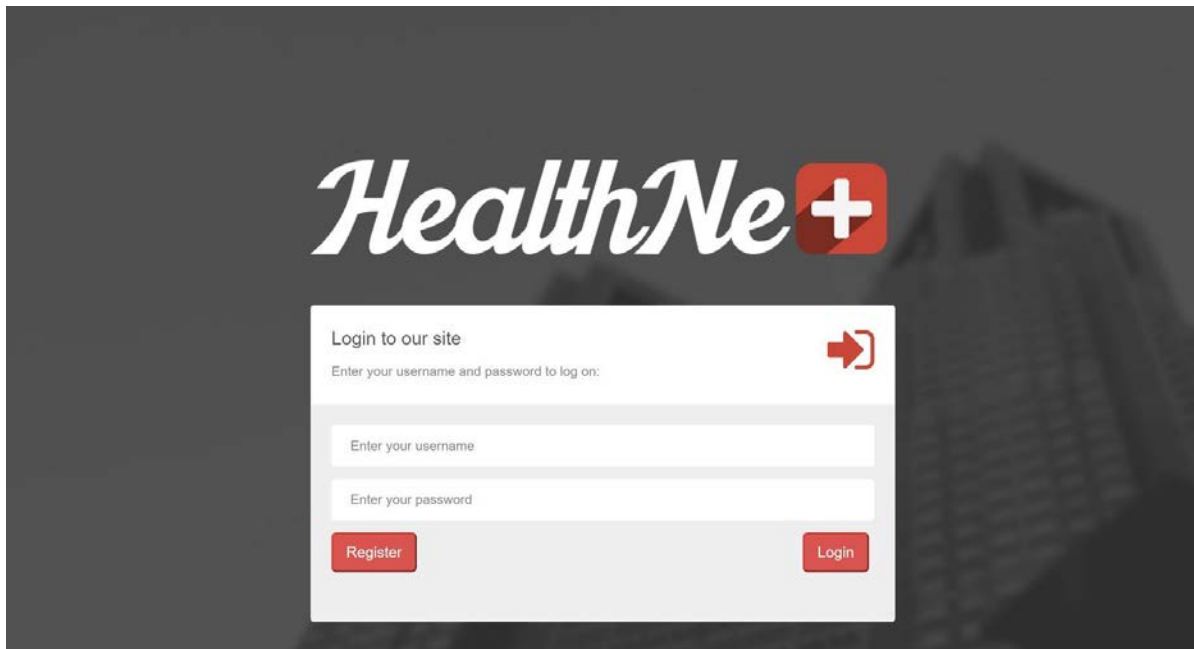

- Python 3.4 (Newer versions work as well)
- SQLite 3.7

Installation

Follow these steps carefully to properly install HealthNet in your computer:

1. Locate the HealthNet_R2_MoisesIsLateAgain.zip file
2. Unzip the file in a directory with easy access
3. Open the Command Prompt/Terminal
4. Move to the directory where you unzipped the file (Use the cd command)
5. Make sure you are in the correct folder (You should be able to access the file “manage.py”)
6. Enter the command “python manage.py runserver”
7. Open a browser and navigate to “http://localhost:8000/”

Welcome to HealthNet!

User Registration

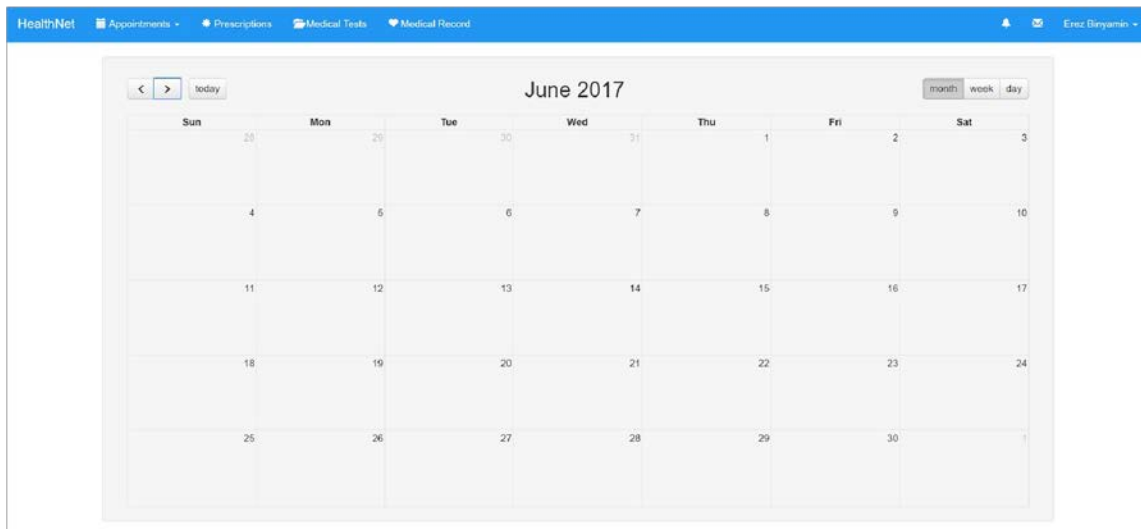

(This step is not required. You can move on to pg5 and use the default accounts at the end of the guide.)

Register a Patient

To register a patient, click **Register** on the HealthNet homepage. The following window will pop up

The image shows a 'HealthNet' logo at the top with a red square containing a white plus sign. Below the logo is a 'Register' form. The form has the following fields: Username (filled with 'johndoe96'), Password (placeholder 'Enter a password'), First Name (filled with 'John'), Last Name (filled with 'Doe'), Email (filled with 'something@example.com'), Phone Number (placeholder '() -'), Date of Birth (filled with '01/01/1990'), Last Physical (filled with '01/01/1990'), Primary Hospital (dropdown menu with 'Strong Memorial Hospital' selected), and Sex (dropdown menu with 'Male' selected). At the bottom right of the form are two buttons: 'Register' and 'Close'.

You must fill out all 10 fields and click **Register**. If everything is filled out correctly, you will be taken to Dashboard:

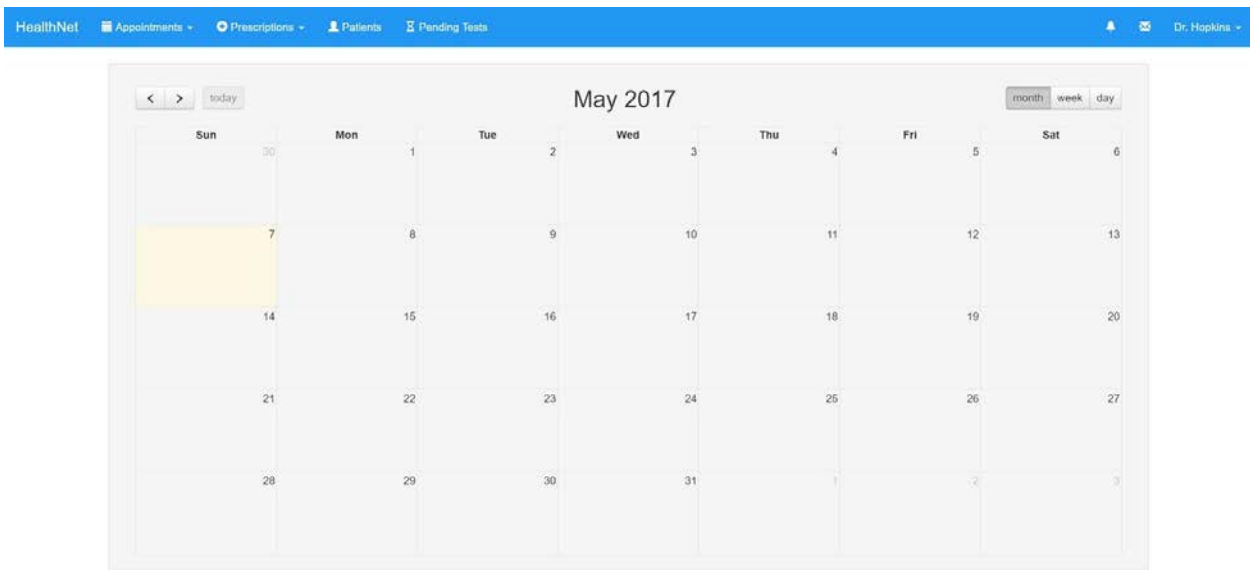

If at any point you decide you don't want to register, you can click **Cancel** and finish the process
Register a Doctor/Nurse

Our system does not allow for Doctor or Nurse account to be made from scratch. In order to register a Doctor or Nurse, you must first have a Patient account and an Admin account. Perform the following steps in order to change your Patient account to a Doctor or Nurse account:

1. Login is as an Admin
 - a. Username: zxcv
 - b. Password: zxcv
2. Click [Permissions](#)
3. Click on the [Patient](#) to want to change
4. Change his [Usertype](#) to Doctor or Nurse
5. Click [Update Patient](#)

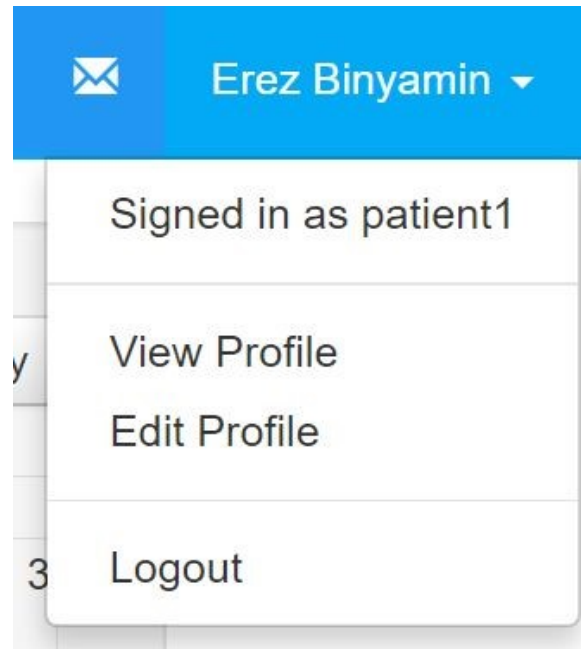

Congratulations! You now have a Doctor/Nurse account!

Viewing and Editing Profile and Medical Information

View and Edit Profile

If you made a mistake during Registration, you can always change your profile by clicking on [your name](#) on the top-right corner of the page and click [Edit Profile](#)

After Registration, you can only edit 6 fields. Once you change the desired fields, you can click on [Save Changes](#) and see the result Profile.

Edit Your Profile

First Name	<input type="text" value="Erez"/>	Last Name	<input type="text" value="Binyamin"/>
Email	<input type="text" value="erez@health.net"/>	Birthdate	<input type="text" value="11/05/1973"/>
Last Physical	<input type="text" value="11/11/2014"/>		
Sex	<input type="text" value="Male"/>	Phone Number	<input type="text" value="(585) 000-0011"/>
Health History	<input type="text" value="none"/>		

Edit Medical Information

Some fields can only be edited from a Doctor's account or Nurse's account. In order to edit things such as a patient's hospital, you must log in as a Doctor or Nurse. Once logged in as a Doctor or Nurse, click on [Patients](#). You will see a list of all the Patients in the system

[Upload Patient Info](#)

Click a patient to admit/discharge, or to view details Search:

First Name	Last Name	Email	Phone	Status	Primary Hospital
Erez	Binyamin	erez@health.net	5850000011	none	Strong Memorial Hospital
Eric	Lin	eric@health.net	5850000013	Admitted	Strong Memorial Hospital
Eric	Mansfield	ermvse@rit.edu	7891234567	Discharged	Strong Memorial Hospital
Liam	Miller	liam@health.net	5850000014	none	Strong Memorial Hospital
Michael	Wohl	michael@health.net	5850000012	none	Strong Memorial Hospital
Mitayshh	Dhaggai	mxd3549@rit.edu	4567891234	Discharged	Strong Memorial Hospital

Showing 1 to 6 of 6 entries Previous **1** Next

Click on the [patient of choice](#).

This will bring up another window with the patient information. You can now change the patient's Primary Hospital, Last Physical, Primary Physician, and their Health History.

Note: You can only change to a Primary Physician that is in the same hospital as the patient. Also, if you change the primary hospital, it will automatically change the doctor to a doctor that is in the new hospital.

Make Appointment

To make an appointment, you can click [on the date](#) when you want to make the appointment. Doing so will bring up a new window.

Schedule An Appointment (30 mins)

Doctor

Dr. Hopkins

Date

05/17/2017

Time (8AM - 5PM)

02:30 PM

Description

Reason for appointment (i.e.symptoms)

Create **Cancel**

You must fill out every field and click [Create](#). The Appointment will then be displayed on the calendar until the time passes or the appointment is cancelled by a Doctor. To cancel an appointment, click on the appointment and click [Cancel](#).

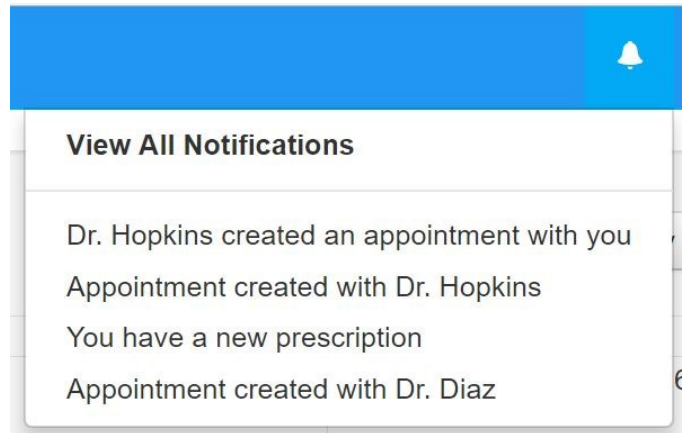

[Delete Appointment](#)

To Delete an Appointment, click on the appointment of choice and click [Delete Appointment](#).

Notifications and Sending Private Message

Notifications

Whenever a user performs an action that has to do with you, the system will send you a notification. You can see those notifications by clicking on the [Notifications Icon](#) on the top-right corner of the screen.

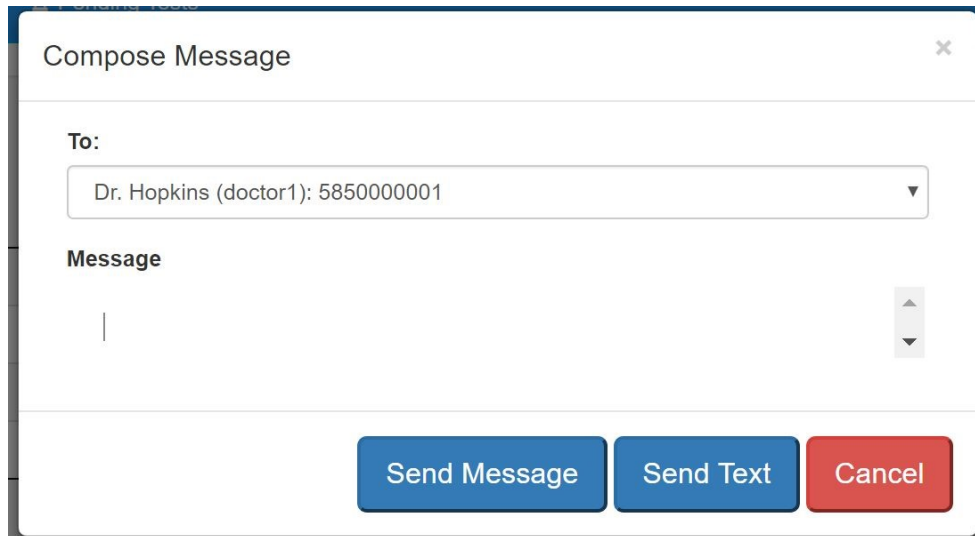

Messaging

Next to the [Notifications icon](#) is the [Messaging icon](#). If you click on it, you will be taken to a page with all the messages you have received.

Compose Message				Search:
